

# Contribute

to a positive  
and sustainable  
development  
of the world

**5** across  
the world

## WHAT DO WE DO?

With the children, their educators, their family and their community we go into an exchange on these 5 topics we care about:

- › Health and well-being
- › Learning and education
- › Values, communities, cultures and diversity
- › Understanding of one-self and others
- › Osmosis with the Earth: responsible consumption, nature's abundance and its protection

## WHY «5 ACROSS THE WORLD»?

As parents, we want to prepare our children to live happily in the world of tomorrow, a world they will be creating with others.

We created the association «5 Across The World» to contribute to a positive and sustainable development of the world through the sharing and exchange with a young generation.

## FOR WHOM?

- › Children between 6 and 12
- › Their teaching communities and accompanying persons
- › The local communities

## HOW?

### › Thematic and recreational workshops

Our family, including the children, hosts workshops with other children, in a place of education, with different formats between one hour of exchange and a day of project initiation.

Several activities have been designed for each topic by experts of each field.

### › Development of local communities

The values and the sharing will be the keys for the dynamic to continue in the long run and independently.

5 Across The World makes animation kits on each topic available.

For their part, the participants develop and follow their community projects in an online platform.

## WHERE?

As our first project we will cross 7 countries in 9 months and visit places of education to meet the children.

**7**  
countries

**9**  
months

## IMPACT

- › The young are prepared to live happily in tomorrow's world
- › The adults: family, teachers, professors are better prepared to support them
- › Members of the local communities with new and positive behaviours, aware that they can be active players of change.

Participate in our initiatives for the young and the communities in South America.

3 possibilities are open to you:

1

Support the dynamics of local operations for a positive and sustainable development with your fellow citizen.

Connect us with schools and other educational places in the mentioned South American countries.

2

Test the usage of your educational material in Latin America to prepare young people for a happy life in tomorrow's world.

Share with us your educational material linked to the 5 mentioned topics.

3

Link your brand to projects of positive and sustainable development.

Financially support our project with high societal impact
